

ABA: 71668983

Pn

The image displays a coronal cross-section of a human brain. The left hemisphere (viewer's left) features a prominent blue highlighted area, likely representing a region of interest or activation. This area is located in the upper-middle portion of the hemisphere, possibly involving the frontal or parietal lobes. The right hemisphere (viewer's right) appears mostly uniform in color, with no significant highlights. A vertical white line runs down the center of the image, separating the two hemispheres. A horizontal white line runs across the middle of the image, just above the 'Pn' label. The background is black, and the text 'ABA: 71668983' is in the top left corner, while 'Pn' is in the bottom left corner.
