

ABA:71724774

VMH

This figure displays a coronal brain scan with a color-coded activation map. The brain is shown in a dark blue color, indicating low activity. A small, localized area of high activity is visible in the central region, colored in a gradient from yellow to red. This area is located in the midline, slightly above the center. The image is overlaid with a white crosshair, with the vertical line passing through the center of the brain and the horizontal line passing through the center of the image. The text 'ABA:71724774' is located in the top left corner, and 'VMH' is located in the bottom left corner.
