The image displays a coronal MRI scan of a human brain. The brain is shown in a cross-sectional view, with the left hemisphere on the left and the right hemisphere on the right. A vertical white line runs down the center, and a horizontal white line runs across the middle, intersecting at the center of the brain. The brain tissue is primarily blue, with a distinct, bright blue spot in the lower-left quadrant, indicating a focal area of hyperintensity. The background is black.
