

ABA: 71763462

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The sections are presented in a side-by-side comparison. The left section shows a small, localized area of blue fluorescence, indicating the presence of the ABA marker. The right section shows a more extensive and uniform blue fluorescence throughout the SCN region. A white crosshair is overlaid on the image, with the vertical line separating the two sections and the horizontal line passing through the center of the SCN. The text 'ABA: 71763462' is located in the top left corner, and 'SCN' is located in the bottom left corner.
