

ABA:71920511

S0

This is an axial PET scan of a human brain. The image displays metabolic activity using a color scale where blue represents low activity and yellow/green represents high activity. The brain's symmetrical structure is visible, with the highest activity concentrated in the outer cortical regions. A vertical white line and a horizontal white line intersect at the center of the brain, likely representing the midline and a reference plane. The text 'ABA:71920511' is located in the top left corner, and 'S0' is in the bottom left corner.
