

ABA:72283807

VA/VL

An axial brain scan image showing a cross-section of the brain. The image is predominantly blue, with a central vertical line representing the midline. A horizontal line crosses the image, and a vertical line is positioned to the right of the midline. In the lower right quadrant, there is a bright blue, elongated region of activation. The text 'ABA:72283807' is located in the top left corner, and 'VA/VL' is located in the bottom left corner.
