

ABA:73424038

CA1

An axial brain scan slice, labeled CA1, showing a central dark region. The image is a grayscale axial slice of a brain, with a central dark region that appears to be a lesion or a specific anatomical feature. The brain tissue is shown in shades of gray, and the central dark region is a vertical, somewhat irregular shape. The image is overlaid with a white grid consisting of a vertical line and a horizontal line, dividing the image into four quadrants. The text 'ABA:73424038' is located in the top left corner, and 'CA1' is in the bottom left corner.
