

ABA:73573283

SCN

The image displays two coronal brain sections, likely from a rat, showing the location of the suprachiasmatic nucleus (SCN). The sections are presented in a side-by-side comparison. The left section shows a blue-stained area in the lower-left quadrant, which is identified as the SCN. The right section shows a similar blue-stained area in the lower-right quadrant. The text 'ABA:73573283' is located at the top left, and 'SCN' is located at the bottom left. The brain sections are set against a black background, and a white crosshair is visible in the center.
