

ABA: 73584759

SCN

A fluorescence microscopy image of a brain section, likely a coronal slice through the hypothalamus, showing the Suprachiasmatic Nucleus (SCN). The image is divided into four quadrants by a vertical and a horizontal white line. The top-left quadrant contains the text 'ABA: 73584759'. The bottom-left quadrant contains the text 'SCN'. The brain tissue is stained with a blue fluorescent marker, showing a dense, somewhat irregular distribution of signal within the SCN region. There are several bright spots of higher intensity, particularly in the upper-left and lower-left areas of the SCN. The rest of the brain tissue shows a more uniform, lower-intensity blue signal.
