

ABA : 73616033

LG

A brain scan image, likely a PET or SPECT scan, showing a cross-section of the brain. The image is predominantly black, with a blue highlighted region in the center, indicating areas of increased activity or uptake. The blue region is concentrated in the midline structures, possibly the thalamus or basal ganglia. The image is overlaid with a white grid, consisting of two vertical and two horizontal lines, dividing the image into four quadrants. The text 'ABA : 73616033' is located in the top left corner, and 'LG' is in the bottom left corner.
