

ABA:74277342

SPa dorsal

The image displays a brain scan, likely a PET or SPECT scan, showing a blue-colored region of activity. The scan is presented in a four-quadrant view, with a vertical white line and a horizontal white line intersecting at the center. The text 'ABA:74277342' is located in the top-left corner, and 'SPa dorsal' is in the bottom-left corner. The blue region is most prominent in the top-left quadrant, with a small, bright spot of high intensity. The rest of the brain area shown is a uniform, lower-intensity blue.
