

ABA: 74425572

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The brain sections are stained in a uniform blue color, indicating the presence of the ABA marker. The sections are positioned symmetrically on either side of a central vertical line, which serves as a midline reference. A horizontal line is drawn across the bottom of the brain sections, and the label 'SCN' is placed below this line on the left side. The text 'ABA: 74425572' is located in the top left corner of the image.
