

ABA: 74581373

S0

This image is an axial brain scan, likely a PET or SPECT scan, showing a cross-section of the brain. The brain tissue is represented by a blue color scale, with darker blue indicating lower signal and lighter blue/yellow indicating higher signal. A prominent, focal area of high signal intensity is visible in the posterior region, specifically in the occipital lobe area. This area is colored in bright yellow and green, indicating a significant increase in metabolic or functional activity. The rest of the brain shows relatively uniform, low-level blue signal. The image is overlaid with a white grid, and the text 'ABA: 74581373' is in the top left and 'S0' is in the bottom left.
