

ABA: 74882216

VA/VL

This is an axial PET scan of a human brain. The image shows a cross-section of the brain with a color scale from blue (low activity) to yellow (high activity). A prominent focal area of increased activity is visible in the left frontal region, appearing as a bright yellow spot. The rest of the brain shows relatively low activity, represented by blue and dark blue colors. A white crosshair is overlaid on the image, with the vertical line passing through the center of the focal area. The text 'ABA: 74882216' is located in the top left corner, and 'VA/VL' is in the bottom left corner.
