

ABA: 74988734

VA/VL

An axial brain scan image showing activation in the anterior cingulate cortex. The image is a grayscale slice of a brain, with a central vertical line and a horizontal line intersecting at the center. The activation is represented by a bright, curved band of light gray color, primarily located in the anterior cingulate cortex region. The rest of the brain slice is dark gray. The text "ABA: 74988734" is located in the top left corner, and "VA/VL" is located in the bottom left corner.
