

ABA:75077262

SPa dorsal

The image displays two side-by-side brain scans, likely axial slices, showing SPa dorsal activity. The scans are rendered in a blue color scale, with brighter areas indicating higher activity. The left scan shows a prominent bright spot in the upper-left quadrant, while the right scan shows a more diffuse, bright ring-like structure. A vertical white line separates the two scans, and a horizontal white line is visible near the bottom. The text 'ABA:75077262' is located at the top left, and 'SPa dorsal' is at the bottom left.
