

ABA:75197624

SN

An axial brain scan image showing a cross-section of the brain. The brain tissue is rendered in a dark blue color against a black background. A vertical white line runs through the center of the brain, representing the midline. A horizontal white line runs across the middle of the brain. In the upper-left quadrant of the brain, there is a small, bright blue spot, which likely represents a focal area of abnormality or a lesion. The text 'ABA:75197624' is located at the top left, and 'SN' is at the bottom left.
