

ABA: 75198094

VA/VL

This image is an axial brain scan, likely an fMRI or PET scan, showing a cross-section of the brain. The brain is rendered in a dark blue color against a black background. A vertical white line runs down the center, representing the midline. A horizontal white line runs across the middle, representing the slice level. In the upper-left quadrant of the brain (corresponding to the patient's right hemisphere), there is a distinct, bright blue area of activation. The rest of the brain appears relatively uniform in color. The text 'ABA: 75198094' is located in the top-left corner, and 'VA/VL' is in the bottom-left corner.
