

ABA:75233702

CA1

A fluorescence microscopy image of a brain section, likely from a rodent, showing the CA1 region. The image is predominantly blue, indicating the presence of a fluorescent marker. The brain is roughly circular in shape, with a central vertical structure (possibly the brainstem or a major vessel) running through it. The image is divided into four quadrants by a vertical and a horizontal white line. The text 'ABA:75233702' is located in the top-left corner, and 'CA1' is in the bottom-left corner.
