

ABA: 75695631

SCN

The image displays two coronal sections of a brain, likely from a rodent, stained with a blue fluorescent marker. The sections are positioned symmetrically on either side of a central vertical white line. The staining is concentrated in the medial preoptic nucleus, which is the location of the suprachiasmatic nucleus (SCN). The text 'ABA: 75695631' is located in the top left corner, and 'SCN' is located in the bottom left corner.
