

ABA:75774660

SCN

The image displays two coronal brain sections, likely from a rodent, showing the location of the suprachiasmatic nucleus (SCN). The sections are presented in a side-by-side comparison. The left section shows a distinct, bright blue fluorescent signal in the SCN region, indicating activation. The right section shows a similar anatomical structure but with a much less intense signal. A white crosshair is overlaid on the image, with the vertical line separating the two sections and the horizontal line passing through the SCN area. The text 'ABA:75774660' is located in the top left corner, and 'SCN' is located in the bottom left corner.
