CA1

The image displays a coronal slice of a brain scan, rendered in a solid blue color against a black background. A white crosshair is overlaid on the image, consisting of a vertical line and a horizontal line that intersect at the center. The brain slice shows a central vertical structure, likely the corpus callosum, which is narrower in the middle and widens towards the top and bottom. The overall shape of the brain slice is roughly oval with some irregularities at the edges.
