VMH

A fluorescence microscopy image of a brain section, likely a coronal slice. The image shows a blue signal, which is a marker for the VMH (ventral medial hypothalamus). The signal is localized to a small area in the center of the brain, near the midline. The rest of the brain tissue is dark. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the center of the blue signal. The text 'ABA: 75988413' is in the top left corner, and 'VMH' is in the bottom left corner.
