

ABA:76081009

S0

This image is an axial brain scan, likely a PET or SPECT scan, showing a cross-section of the brain. The brain tissue is represented by a blue color scale, with darker blue indicating lower signal and lighter blue/green indicating higher signal. A prominent focal area of increased signal intensity is visible in the posterior region, specifically in the occipital lobe area. This area is highlighted with a yellow-green color, indicating a significant increase in metabolic or functional activity. The rest of the brain shows a relatively uniform, low-level signal. The image is overlaid with a white grid, and the text 'ABA:76081009' is visible in the top left corner and 'S0' in the bottom left corner.
