

ABA:77280331

SCN

The image displays a coronal section of a brain, likely from a mouse, with a focus on the Suprachiasmatic Nucleus (SCN). The tissue is stained with a blue fluorescent marker, ABA, which is identified by the label 'ABA:77280331' in the top left corner. The SCN is specifically labeled in the bottom left corner. The image is divided into four quadrants by a vertical and a horizontal white line. The ABA staining is most prominent in the upper right quadrant, where a bright, localized spot of fluorescence is visible. Other smaller, less intense spots of fluorescence are scattered throughout the SCN region, particularly along the vertical line and in the lower right quadrant. The overall background of the brain tissue is dark, making the blue fluorescence stand out.
