

ABA:77800951

MD

The image displays a coronal cross-section of a brain. A large, irregularly shaped region in the left hemisphere (viewer's right) is highlighted in a bright blue color. This region appears to be a lesion or a specific area of interest. A vertical white line runs through the center of the brain, likely representing the midline. The rest of the brain tissue is shown in grayscale, and the background is black. The text 'ABA:77800951' is located at the top left, and 'MD' is at the bottom left.
