SCN

The image displays two coronal brain sections, likely from a rodent, stained for the Suprachiasmatic Nucleus (SCN). The sections are positioned symmetrically on either side of a central vertical white line. The SCN is highlighted in a bright blue color, appearing as a dense, roughly circular area in the lower portion of each brain section. The surrounding brain tissue is dark, providing a high contrast for the blue-stained SCN. A horizontal white line is visible at the bottom of the image, intersecting the vertical line.
