

ABA: 79534965

DM

The image displays a coronal section of a brain, likely from a rodent, with a blue fluorescence signal. The signal is most prominent in the lower-left quadrant, which is labeled 'DM' (dorsomedial nucleus). The rest of the brain section shows a uniform, low-intensity blue background. A white crosshair is overlaid on the image, with the vertical line passing through the center of the brain and the horizontal line passing through the DM region. The text 'ABA: 79534965' is located in the top-left corner.
