SCN

The image displays a coronal section of a brain with a fluorescence signal. The signal is concentrated in a small, bright yellow-green spot located in the midline, ventral region, which is identified as the SCN (Suprachiasmatic Nucleus). The rest of the brain tissue shows a low-level blue background signal. A white crosshair is overlaid on the image, with the vertical line passing through the center of the SCN signal and the horizontal line passing through the bottom of the image.
