

ABA: 79912552

DM

The image displays two coronal slices of a brain, likely from a magnetic resonance imaging (MRI) scan. The brain tissue is rendered in shades of blue. A vertical white line separates the two slices. In the lower right slice, there is a distinct, bright blue focal area, indicating a region of abnormal signal intensity. A horizontal white line is drawn across the middle of the brain slices. The text 'ABA: 79912552' is located in the top left corner, and 'DM' is in the bottom left corner.
